

OPTICBOX

*The Integrated Solution in
Practice Management Software*

Developed by

**TIMEBOX
SOLUTIONS** 

What makes OpticBox your best choice?

OpticBox is designed to be EASY and FAST for all your staff including those who may have never used a computer before. It will change the way your practice works for the better!

Key Points:

1. OpticBox is a single, integrated application designed for the UK. Many other solutions are modular which means you can buy the patient records module without, for example, the appointment system. This limits integration because a solution like this must be both an "apple" and an "orange" – it has to work with or without a whole host of other applications.

2. OpticBox hides Microsoft® Windows to look and work like a dedicated system. It has been designed so that it can be run entirely from a touch screen all the time. This makes for a more professional and easier to use solution.

3. OpticBox works without any "helper" programs. Many other solutions use links to other programs for essential functions. A common example is a mail merge link to a word processor, like Microsoft® Word, to print recall letters. This adds complexity and can cause problems. Its also important to note that these other programs aren't designed to be run from a touch screen.

4. OpticBox takes advantage of today's modern computer monitors which run at screen resolutions of 1024x768 or higher. Many other solutions were designed years ago when monitors ran at 800x600 (40% smaller) or 640x480 (60% smaller). Running at 1024x768 means that you can see everything important on a single screen.

The Integrated Solution in Practice Management Software

OpticBox Patients and Recall

Postcoding Software Included!

Saves time and reduces errors.

Appointment Log

See all past and future appointments. Quickly create, edit and delete appointments.

Household Feature

Quickly view patient records for other family members. Fully automatic, requires no setup whatsoever.

Advanced Recall Capabilities

Recall schemes work your way. Even one off recalls for initial contact lens checks.

Single screen with full patient details

See everything on one screen including the most recent prescriptions.

Built In Mail Merge

Print custom recall, GP and marketing letters in an instant!

OpticBox Appointments

Graphical View of Appointments

Appointments appear exactly as you would expect them to.

Side by Side Day View

Quickly see available choices. Work with an unlimited number of Opticians.

Clinic Shading

See clinic times at a glance.

Week View

Shows a whole week at a glance!

Appointment List

Rapidly edit and delete appointments.

Easy Integration to Patients

Quickly associate appointments with patients.

Repeating Appointments

By day, week, month and more.

OpticBox Sales

Custom Receipts

Include your logo on your receipts.

View Patient Button

Rapidly move between patient details and sales.

NHS Voucher Support

Take and record NHS vouchers painlessly.

Product Code Flexibility

Work with either complete codes or simplified codes.

Unlimited Payments

Increase speed and accuracy.

Bar Code Integration

Increase speed and accuracy.

Call 0845 644 6612 today and arrange to see OpticBox for yourself.

10 reasons to see OpticBox for yourself

1. OpticBox's main screen shows you and your staff exactly what needs to be done today and includes a constantly updated graph of upcoming recalls.

2. OpticBox works with a handy dedicated label printer. Press one button to print many different labels. Supported labels include address, record card, GP address labels, prescriptions, appointment reminders, supplier and bar code price tags.

3. OpticBox has a powerful search engine which can find marketing opportunities. You can find patients by age, last test date, sex, postcode and many, many more criteria. Complex searches adding this and omitting that are no problem.

4. OpticBox's built in mail merge gets your marketing done. Press one button to send a mail merged letter to a group of patients.

5. OpticBox can often run on existing hardware. Call TimeBox Solutions today to learn if you existing computer can run OpticBox.

6. TimeBox Solutions sells and supports reliable, compact, quiet PCs which are ideal for optical practices.

7. OpticBox can import your existing data. Names, addresses and other data in an existing system can, in most cases, be imported at modest cost and with minimal fuss.

8. OpticBox networks easily and cost effectively. Network users have access to all functionality.

9. OpticBox protects your valuable data with completely automatic backups! Just press shutdown at the end of each day and your data is backed up.

10. OpticBox is getting even better all the time. All customers with valid maintenance contracts receive all OpticBox upgrades including all new functionality.
